## Asset Technology Re-Invented

# GPS Devices & Software Developed with Your Specific Business Application in Mind

X4000B GPS is the latest evolution of GPS technology from an engineering team of industry & financial professionals. The X4000B's evolution has transcended simple GPS technology to a feature rich scalable software & technology package. With the X4000B GPS Solution, customer challenges will be looked at differently. You now have the ability to manage accounts and modify customer behavior with proven methods. This will now help you reduce delinquencies and collection cost while increasing cash flow and customer retention.

This tried and true technology has proven itself for many years and helped collect billions in receivables. Industry leading dealers & finance companies are currently implementing this technology due to portfolio challenges. The X4000B GPS software & technology builds on the success of simple starter interrupt devices and simple track/locate GPS units. With this feature rich package, you have the ability to maintain greater control of your portfolio while extending credit to an increased number of credit challenged customers.

<b>Feature</b>	<b>Benefit</b>
<b>Auto Diagnostic Report</b>	You will receive an Auto Locate every 6 hours & 15 minutes helping you know the location history of the vehicle should you have to retrieve your asset. (Average 125 Locates per month) at no additional charge
<b>Alerts &amp; Notifications</b>	Many alerts can be customized for your particular needs. You can be notified via Text and/or email
<b>Geo Fences</b>	A Geo Fence is an invisible threshold that can be set to notify a dealer/finance/asset manager when a vehicle has crossed the pre-defined boundary (Geo Fence Notification). The device has the ability for the dealer/finance/asset manager to define individual locations. e.g. home/work/impound lot
<b>Landmarks</b>	A point of interest that can be pre-defined by a dealer/finance/asset manager
<b>State Alert</b>	You will be notified if a specific vehicle Leaves a specified state
<b>Stopped Reporting Alert</b>	You will be notified if the vehicle has not reported for the specified time frame
<b>Off Hour Alert</b> <i>Lot Protection</i>	Off-hour alerts allow you to receive notifications if a device is being used during specific hours of the day
<b>Low Battery Alert</b>	If the vehicles battery drops below a pre-set limit, you will receive an Alert
<b>Tamper Alert - Built in Battery Back-Up</b>	If the Power is interrupted or tampered with in any way, you will receive an Alert. The back-up battery will maintain the normal functionality of your devices which enable you continued tracking of your portfolio
<b>Speed Alert</b>	If the vehicle exceeds a predetermined speed, you will receive an Alert
<b>Maintenance Alert</b>	You can be notified when your vehicles reaches a pre-determined amount of miles or a specific date
<b>Starter Interrupt (optional)</b> <i>with Never Stranded</i>	You can send a command so the vehicle will not start, allowing you to regain control of your asset, preventing excess mileage and possible damage to the vehicle. Will not disable when running
<b>Locate on Demand</b>	You as the owner can quickly locate the vehicle by logging on to the website from any internet capable computer
<b>Mapping by Google Earth</b>	Shows you the location of your asset anytime, anywhere with Street, Hybrid & Street Level View maps.
